[Fixed Error with Mental Muscle Group Progress Bars](#)

[Fixed Error Allowing Users Unlimited Point Gain](#)

[User Password Change Update](#)

Resilient organizations thrive through stressful times.

Detail

Updated the Interpretation Text Order

- The Interpretation Text Order for each starting point has been flipped. Previously it was displayed as neglected to preference, now preference to neglected.

Fixed Bug with Video Loading Using Safari

- Users have experienced a bug with our video content loading while using safari. Our team has attempted to resolve this issue for users using the safari platform.

Added MFA Support

- Multi factor authentication has been added to the system. It is turned off by default, but can be turned on at any time in account settings.

Updated Podcast Title Name

- We have updated our podcast title to "How do I take back control in this never ending....." to "Take back control during Covid".

Added a Back Button

- A back button has been added to the skill content. Users can go back and change their response as they progress through a skill. Doing so will update future instances of that element appearing, if applicable.

General Updates to the User Dashboard

- Our team has updated the user dashboard to facilitate the users progress through the digital journey. Users will now experience different dashboard text depending on their progression through AIR Space.

Created Generic Message for the Authorization Error

Resilient organizations thrive through stressful times.

- Our team has created a generic message when an authorization error appears, similar to the error that appears when a user tries to rest their password.

FIXED ERROR WITH THE MENTAL MUSCLE GROUP PROGRESS BARS

- A user noticed an error with the Mental Muscle Group Progress Bar not reflecting their Muscle Group progress. This error has been resolved.

FIXED ERROR ALLOWING USERS UNLIMITED POINT GAIN

- The error allowing users to gain unlimited points has been resolved.

USER PASSWORD CHANGE UPDATE

- A correction has been made, that will log users out of all devices upon a password change.

Resilient organizations thrive through stressful times.
